Channel Assortment

We've curated over 80 Channels to meet a variety of musical interests and most importantly, suitability for commercial business use. Additionally, we offer music programming and design for applications that demand special attention.

Virtual Remote Control

Within seconds, you can control channel selection, adjust volume, and monitor status without even having to download an app. Easy-peasy and you look like a genius!

Customization for Large-Scale Implementations

When basic channel-list selection doesn't cut it, count on us to curate a solution that elevates your music listening experience to new heights. Whether it's renaming channels, adding new mixes, creating custom channel lists, or hand-curating streams song-by-song, we've got you.

Active/Inactive Status

FLEX has a 7-day programmable Active/Inactive schedule or "on/off" mode. All units are shipped 24/7 ACTIVE, but in the rare instance where you prefer to schedule hard stops, or OFF periods, we'll work with you to set the appropriate schedule.

Automatic Channel Scheduling (Day-Parting)

Start the day(s) off with Roadhouse Rock and then tame it down for customers at 10am with Automatic Channel Scheduling a.k.a. Day-Parting. Seven-day Channel Scheduling down to 30-minute increments. Schedule **OFF MODE | Silence** for after hours or play music 24/7 with programmed channel switching to your heart's desire.

Scheduled & On-Demand Announcement Playback

Integrate custom announcements into licensed music streams using both scheduled and on-demand playback. Announcements are typically 25 words or less and used for imaging or to highlight special sales or upcoming events.

Failsafe Music Solution

Much of today's technology depends on reliable Internet connectivity. Should your Internet go down, our Flex Audio Player cross-fades seamlessly to a locally stored playlist with 10 hours of music designed to loop until your Internet service is restored. Your device auto-detects connectivity and resumes live-streaming automatically.
